

Sheikh Rassel

PROFILE

Self-taught and highly motivated mobile app developer passionate about creating educational and daily-use applications that make a real impact. With a strong foundation in both Android and cross-platform development using Java and Flutter, I've independently designed, built, and published a teacher-approved learning app on the Play Store. Fluent in multiple languages and equipped with hands-on experience, I'm now focusing on building more versatile applications and growing into a full-time Flutter Developer.
